

§ 29.6090

percentage may be sampled at the discretion of the inspector. To obtain the sample, a sufficient amount of tobacco shall be drawn to be representative of each selected bale. In determining the grade, the inspector shall consider the quality of all samples. The grade assigned shall represent the quality of the lot as a whole.

§ 29.6090 Rule 4.

Standard grades shall be assigned to clean and sound tobacco only.

§ 29.6091 Rule 5.

Tobacco leaves shall be placed straight in bundles or bales of normal weight, size, and shape with the butts out and tips overlapping from 6 to 8 inches or sufficiently to make a level, solid, and uniform pack. The sides of the bundles shall be completely covered with paper, or other suitable protective material, and tightly bound with not less than three large twines spaced so that the tobacco will be held securely together. Improperly packed tobacco shall be designated as "No—G."

§ 29.6092 Rule 6.

The grade assigned to any lot of tobacco shall be a true representation of the tobacco at the time of inspection and certification. If, at any time, it is found that a lot of tobacco does not comply with the specifications of the grade previously assigned, it shall not thereafter be represented as such grade.

§ 29.6093 Rule 7.

Any lot of tobacco which meets the specifications of two grades shall be placed in the higher grade. Any lot of tobacco on the marginal line between two grades shall be placed in the lower grade.

§ 29.6094 Rule 8.

A lot of tobacco meets the specifications of a grade when it is not lower in any degree of any element of quality than the minimum specifications of such grade.

§ 29.6095 Rule 9.

In determining the grade of a lot of tobacco, the lot as a whole shall be

7 CFR Ch. I (1–1–06 Edition)

considered. Minor irregularities which do not affect over one percent of the tobacco shall be overlooked.

§ 29.6096 Rule 10.

Interpretations, the use of specifications, and the meaning of terms shall be in accordance with determinations or clarifications made by the Chief of the Standardization Branch and approved by the Director of the Tobacco Division, Agricultural Marketing Service.

§ 29.6097 Rule 11.

The use of any grade may be restricted by the Director during any marketing season when it is found that the grade is not needed or appears in insufficient volume to justify its use.

§ 29.6098 Rule 12.

Uniformity shall be expressed in percentages. These percentages shall govern the portion of a lot which must meet each specification of the grade; the remaining portion must be related. Grade specifications state the minimum acceptable degree of each element of quality. Specified percentages of uniformity shall not affect limitations established by other rules.

§ 29.6099 Rule 13.

Injury tolerance shall be expressed in percentages. The appraisal of injury shall be based upon the percentage of affected leaf surface or the degree of injury, and consideration shall be given to the kinds of injury normal to the group or grade.

§ 29.6100 Rule 14.

Stem rot shall not exceed 40 percent of the specified injury tolerance for any grade.

§ 29.6101 Rule 15.

In grade specifications the tolerance of crude shall apply to the entire leaf surface of the lot.

§ 29.6102 Rule 16.

In grade specifications frozen shall be treated as a separate kind of injury and the tolerance shall apply to the entire leaf surface of the lot.
